

Alireza (Arshia) Pakdaman

APPLICATION FOR DATA MANAGEMENT SPECIALIST

North York, Ontario • (437) 771-3216 • alirezapakdaman23@gmail.com

alirezapakdaman.com • linkedin.com/in/alirezapakdaman • github.com/alireza-pakdaman

Data analyst and IT infrastructure specialist with three years across the data and infrastructure stack: SQL reporting, ETL pipelines, Azure cloud, Linux server administration, shell scripting, and backup and recovery. Nearly two years permanent full time at Nordvern International on IT web development and Azure cloud, where I built the company website and the infrastructure under it, covering hosting and deployment, domain, DNS and TLS, wrote its SQL reporting, and configured backup and recovery. Now at Ontario Tech University, building the pipelines behind the university's recurring student and financial reports and documenting the queries, logic and results they run on. BSc Computer Science, Ontario Tech, expected 2027.

RECOGNITION

Employee of the Year

Nordvern International, Certificate of Excellence. Awarded for keeping the company's systems and web infrastructure running.

Chosen by the Dean

Selected directly and exclusively by the Dean of the Faculty of Business and IT as sole developer of the AI pipeline for a live opera production.

EXPERIENCE

MAY 2025

PRESENT

Data Analyst

Ontario Tech University • Oshawa, ON • contract, full time

- Analyze student and financial data and produce the recurring, data driven reports that university stakeholders work from.
- Build and maintain the ETL pipelines feeding those reports, in Python and R.
- Document reporting needs, queries, logic, results and recommendations so analyses can be rerun and verified by other staff.
- Liaise with academic and finance stakeholders on data requirements, collection and availability.

JUL 2025

OCT 2025

Undergraduate R&D Scientist

Ontario Tech University • Oshawa, ON

- Sole producer and developer of the generative AI pipeline for "Meladramma AI," a live opera production, chosen for the role directly by the Dean of the Faculty of Business and IT.
- Built and trained GAN and diffusion models generating vocal textures and stage visuals used in performance.
- Coordinated with the Faculty of Arts and Humanities to integrate the pipeline into a live show on a fixed opening date.

MAY 2023

JAN 2025

IT Web Development and Azure Cloud

Nordvern International • Toronto, ON • permanent, full time • 1 yr 9 mos

- Built the company's public website (nordvern.com) and set up the hosting and deployment pipeline behind it. The site and its infrastructure are still in service.
- Ran the company's Microsoft Azure cloud environment and its servers, and owned domain, DNS and TLS certificate configuration for the web presence.
- Wrote the SQL queries and reports the team relied on for day to day operational reporting.
- Configured backup and recovery procedures so business data could be restored after a failure, and set access controls so only authorized staff could reach company data.
- Kept a downtown Toronto office running: troubleshooting, infrastructure and technical support for staff. **Named Employee of the Year.**

JAN 2025
APR 2025

Software Development Trainee

Wouessi Digital • Toronto, ON • internship

- Full stack work on a production employee management system: frontend features and REST API integration.
- Worked inside an established codebase to team standards, with code review and version control.

SEP 2024
JAN 2025

Software Developer

Dexlab • Ontario, Canada • internship

- Coded, debugged and shipped features on a small, fast moving team, spanning programming and network security work.

MAY 2022
SEP 2022

Web Developer

Alphesda Interactive • Melbourne, Victoria, Australia • internship

- Built and maintained client facing web experiences for an offshore team.
